A LITTLE HISTORY OF AFTERNOON TEA

from a light snack to fashionable society entertaining

Tea consumption increased dramatically during the early nineteenth century and it is around this time that Anna, the 7th Duchess of Bedford is said to have complained of having that “sinking feeling” during the late afternoon.

The solution for the Duchess was a pot of tea and a light snack, taken privately in her boudoir during the afternoon. Before long all of fashionable society was sipping tea and nibbling sandwiches in the middle of the afternoon.
